Intermarché: category first

Intermarché
MIEUX MANGER TOUS LES JOURS

The category anchors the brand; functional benefits are layered where consumers naturally expect them. Organic, natural and local cues cut across categories.

DAIRY

Pâturages

- Protein
- Fortification
- Reduction
- Organic

Dairy → protein is the most intuitive functional extension.

CEREALS / BISCUITS

Chabrior

- Fibre / wholegrain
- Fortification
- Clean label
- Organic

Cereals → fibre and wholegrain are native to the category.

FRUIT / BEVERAGES

PAQUITO

- No-added-sugar
- Organic / natural
- Origin

Beverages → naturalness and sugar reassurance fit better than protein.

SAVOURY SNACKS

BOUTON d'OR

- Fibre / reduction where relevant
- Organic / provenance
- Ingredient / origin cues

Even indulgent snacks can communicate local origin.

ACROSS CATEGORIES → ORGANIC • NATURAL • FRENCH / LOCAL ORIGIN • PRODUCER / PROVENANCE

Pâturages Skyr Nature
Riche en protéines • Lait français • Sans matières grasses

Chabrior Flocons d'avoine
Riche en fibres • Source de vitamine B1, magnésium et fer

Paquito Pomme Framboise
Sans sucres ajoutés • Pommes cultivées en France

Bouton d'Or Rings
French-origin ingredients on an indulgent snack

Even a Nutri-Score C snack still foregrounds French origin.

Intermarché organizes private label by food category. Functional benefits stay category-native; organic, natural and local provenance cut horizontally across the portfolio.

E.Leclerc: category first, 'what kind?' second

E.Leclerc
Bien plus que des produits

The category anchors the choice; shoppers are then routed by proposition — everyday, organic, regional or performance — while functional benefits remain native to the food.

CATEGORY → **PROPOSITION SPACE** → **CATEGORY-NATIVE BENEFIT**

EVERYDAY / MAINSTREAM

Délisse

Mainstream dairy anchor

- Protein
- Fortification
- Reduction

Mainstream dairy first; function is layered inside it.

ORGANIC

BIO village

Transversal Bio proposition

- Organic / natural
- Fibre where category-native
- Provenance

Organic can transcend categories because shoppers think "I want Bio."

REGIONAL / TRADITIONAL

NOS RÉGIONS ONT DU TALENT

Regional provenance proposition

- Origin / provenance
- Terroir
- Traditional quality

Regionality is a proposition in its own right, not a nutrition benefit.

PERFORMANCE

SPORT

Specialist performance line

- Protein
- Energy
- Hydration
- Fortification

Performance can override category and span dairy, bars and drinks.

CATEGORY STILL SETS THE GUARDRAILS → Dairy: protein / fortification • Cereals & snacks: fibre / wholegrain • Beverages: reduction • SPORT: multi-benefit

Délisse Déli'time
Protein dairy
Mainstream category-native functionality

Bio Village Flocons d'Avoine
Organic cereal
Bio + fibre in a category-native format

Nos Régions ont du Talent Faisselle
Regional dairy
French provenance / traditional quality

SPORT Énergie céréales chocolat
Performance snack
Specialist line crossing category boundaries

E.Leclerc keeps the category as **the backbone, then adds a second decision layer:** what kind of product do you want — everyday, organic, regional or performance?

Carrefour: two parallel logics — price tier and consumer priority

1/2 **Price tier.** Price level structures the range, but functional benefits can appear across tiers tiers. Even then, category-native logic still holds.

Carrefour

ENTRY PRICE	EVERYDAY	ELEVATED	PREMIUM
Simpl	Classic'	Extra	Selection
Accessible essentials	Mainstream core	More pleasure / more value-added	Premium quality / experience
Function can still appear — e.g. reduced-fat basics	Mainstream dairy can still shout protein / calcium	More elevated products can still carry beverage-native reassurance	Premium is usually about quality / origin, not health-led function

TIER DETERMINES VALUE. CATEGORY DETERMINES CREDIBLE FUNCTION.

CATEGORY-NATIVE EXAMPLES → Dairy: protein / calcium / reduction • Cereals & snacks: fibre / wholegrain • Beverages: sugar reduction or reassurance • Premium does not need a functional claim.

Simpl
Beurre doux 60% M.G.
Entry-price + reduced-fat basics

Carrefour Classic
Fromage blanc nature
Mainstream dairy: protein + calcium

Carrefour Extra
100% pur jus orange
Elevated tier; benefit logic still follows the category

Sélection
85% noir cacao Tanzanie
Premium quality / origin rather than health-led function

Carrefour uses price tiers to structure value — from Simpl to Sélection. Functional nutrition can surface anywhere, but the food category still decides which benefits feel credible.

Carrefour: two parallel logics — price tier and consumer priority

2/2 Consumer priority. Some shoppers start from what matters to them: Bio, local heritage, sourcing standards or discovery. Functional benefits still stay native to the food category.

Carrefour

ORGANIC / NATURAL

Carrefour BIO

"I want Bio."

- Organic certification
- Naturalness
- Plant-based adjacency
- Sometimes fibre / protein where category-native

LOCAL / HERITAGE

Reflets de France

"I want something local / authentically French."

- Origin
- Terroir
- Traditional recipes
- Regional identity

QUALITY / SOURCING

FILIÈRE QUALITÉ

"I care how it was produced."

- Traceability
- Production standards
- Farmer / sourcing commitments
- Responsible quality chain

DISCOVERY / TRENDS

Carrefour Sensation

"I want something new / trendy."

- New formats
- Contemporary food trends
- Cross-category experimentation
- Protein cluster

CATEGORY-NATIVE FUNCTION STILL APPLIES → Dairy: protein / fortification • Cereals & snacks: fibre • Beverages: reduction • Trend-led products can stretch across categories, but the benefit still fits the food.

Carrefour Bio
Son d'avoine Bio
Bio + fibre + protein

Reflets de France
Cidre artisanal de Bretagne
Heritage / regional identity

Filière Qualité Carrefour
Lait demi-écrémé
Sourcing standards + fairer farmer remuneration

Carrefour Sensation
High Protein pasta
Trend-led protein outside dairy

Some Carrefour shoppers start from the category; others start from a priority — Bio, local origin, sourcing quality or discovery. Carrefour builds architecture for both behaviours.

Groupe Casino: store first, price tier second

Each store chain has its own private-label architecture. First price, core and premium structure value; Bio sits alongside the ladder. Functional benefits come later and stay category-native.

GROUPE Casino — NOURRIR UN MONDE DE DIVERSITÉ

CASINO / SPAR / VIVAL
Proximity stores for everyday shopping

- **Value / first price** (selected lines)
- **Casino** Core range
- **Casino Délices** Premium / indulgence
- **Casino Bio** Organic (alongside)

A broad range for everyday needs, from value to premium, with Casino Bio across categories.

FRANPRIX
Urban convenience stores

- **Tous les Jours** First price
- **Leader Price** Core range
- **Franprix** Everyday quality
- **Franprix Bio** Organic (alongside)

A simple, accessible architecture with Tous les Jours at entry level, Leader Price as the core range and Franprix Bio across categories.

MONOPRIX
Urban lifestyle and premium shopping

- **Monoprix** Core range
- **Monoprix Gourmet** Premium / discovery
- **Monoprix Bio** Organic (alongside)

A curated offer for urban shoppers, with Monoprix at the core, Monoprix Gourmet for premium products and Monoprix Bio across categories.

NATURALIA
Specialist organic stores

- **Naturalia** Organic is the starting point, not a tier.

A 100% organic store chain with a dedicated organic range across fresh, grocery and non-food.

FUNCTION COMES AFTER ARCHITECTURE → DAIRY: PROTEIN • CEREALS/SNACKS: FIBRE • BEVERAGES: REDUCTION • BIO: ACROSS CATEGORIES

Monoprix Skyr Nature
Riche en protéines • Lait français • Sans matières grasses

Franprix Biscuits Petit Déjeuner
Céréales et pépites de chocolat Allégés en sucres

Casino Bio Boisson au Soja
Source de calcium • Source de protéines végétales • Bio

Monoprix Gourmet Caviar Français
Un produit d'exception illustrant la dimension premium de la gamme

An indulgent premium product showing the 'Gourmet' role of the range.

Different store chains, different price ladders — but the same rule underneath: the store chain and value architecture come first; functional benefits are layered onto the foods where consumers naturally expect them.

Groupe U: U by default, then 'what do I need?'

Most everyday products stay simply U. When shoppers start from a stronger priority — organic, regionality, performance or a specific dietary need — dedicated ranges take over. Functional benefits remain category-native.

GROUPE U
COMMERCANTS AUTREMENT

EVERYDAY / DEFAULT
I just need the product.

- Wide range across key food categories
- Protein (category-native)
- Fortification
- Reduction
- Fibre / wholegrain

U is the everyday choice, with functional benefits where consumers expect them.

ORGANIC
I want Bio.

- Organic across categories
- Fibre where relevant
- Fortification (e.g. calcium)
- Responsible sourcing

U Bio is a transversal range that brings organic credentials, with additional benefits depending on the category.

REGIONAL / QUALITY
I want local or something more special.

- French origin / local regions
- Premium ingredients
- Traditional recipes
- Higher quality / indulgence

U de Nos Régions and U Saveurs offer local origin and premium quality, on top of the core U range.

PROTEIN / PERFORMANCE
I want more protein / I'm training.

EVERYDAY PROTEIN
- High protein
- For the whole family (adults, active, seniors)
- No sweetener (selected)
- Good nutrition profile (e.g. Nutri-Score A)

SPORT PERFORMANCE
- Energy & hydration
- Sports nutrition
- Protein
- Electrolytes & vitamins

Protéines+ for everyday high-protein needs.
U Oxygn for specialist sports performance.

DIETARY NEED
I need gluten-free.

- Gluten-free across relevant categories
- Good nutrition profile
- Same taste, no compromise

U Sans Gluten makes it easy to find gluten-free options in everyday foods such as snacks, cereals, dairy and more.

U Anneaux Miel
Cereal with fibre
Nutri-Score A • French wheat

U Bio Boisson au Soja Chocolat
Organic • Source of protein
Source de calcium

U de Nos Régions Yaourt Vanille
French milk • Traditional recipe
Quality and local provenance

U Protéines+ Crème Dessert Chocolat
High protein (13g/portion)
No sweetener • Nutri-Score A

U Oxygn Boisson Isotonique
Sports hydration • Electrolytes
Vitamins B1, B2, B6

U Sans Gluten Goûters Cacao
Gluten-free snack
Good taste, no compromise

Same principle, different entry point: U by default, then dedicated ranges when a specific need becomes the priority.
Functional benefits stay category-native, except when the need is strong enough to become a range in its own right.

Auchan: ‘just product’ → ‘product +’ → specialist

The core private label is simply Auchan. Some familiar foods get an added reason to choose them — Bio, less sugar, origin or responsible sourcing — while specialist ranges are built around a distinct need.

JUST PRODUCT

Auchan

Mainstream core range

- Category-native protein
- Fibre / wholegrain
- Reduction where relevant
- French origin cues often visible

The food comes first; benefits stay native to category.

PRODUCT + ORGANIC

Auchan BIO

Cross-category organic range

- Organic / natural
- No-added-sugar where relevant
- Plant-based adjacency
- Can cross categories

Shoppers start from Bio, then choose the product.

PRODUCT + EXTRA REASON

Auchan Less Sugar*

Auchan Terroir

Cultivons le bon — Solidaires

An added reason to choose the product

- Less sugar / reduction
- Origin / regionality
- Responsible sourcing

Some products add one extra reason to choose them.

SPECIALIST

Auchan EAT'N MOVE

Performance nutrition architecture

- Energy
- Hydrate
- Proteins
- Whey

A distinct performance range beyond everyday food.

CORE AUCHAN STILL FOLLOWS THE CATEGORY → Dairy: protein / fortification • Cereals & snacks: fibre • Beverages: reduction

Auchan Crème dessert chocolat
Just product • mainstream dairy • French milk origin

Auchan Bio Soja
Product + organic • no added sugar • vegan

Auchan Less Sugar bars
Product + benefit • 60% less sugar

Eat'N Move Whey
Specialist performance • 22 g protein per serving

Specialist line: unlike core Auchan, this range is built around the performance need itself.

Auchan starts from the normal food, adds an extra reason to choose it when needed, and creates a specialist range when the consumer job becomes fundamentally different.

Protein: mostly market-like

Median protein per 100 g/ml by retailer × category vs France category median. Whole-category medians reflect actual composition and are mix-sensitive.

RETAILER	DAIRY France median: 6.5	CEREALS France median: 9.3	SNACKS France median: 6.4	BEVERAGES France median: 0.1
Intermarché	5.0 Δ -1.5	8.8 Δ -0.5	6.5 Δ +0.1	0.1 Δ 0.0
E.Leclerc	18.0 Δ +11.5	8.5 Δ -0.8	6.4 Δ 0.0	0.5 Δ +0.4
Carrefour	7.5 Δ +1.0	8.6 Δ -0.7	6.2 Δ -0.2	0.4 Δ +0.3
Groupe Casino	9.0 Δ +2.5	8.7 Δ -0.6	6.5 Δ +0.1	0.0 Δ -0.1
Groupe U	6.2 Δ -0.3	8.8 Δ -0.5	6.4 Δ 0.0	0.5 Δ +0.4
Auchan	4.1 Δ -2.4	8.4 Δ -0.9	6.4 Δ 0.0	0.5 Δ +0.4

KEY TAKEAWAYS

1. Cereals, snacks and beverages **stay close to the market median.**

2. E.Leclerc's high dairy median is **mix-driven**: ~54% of dairy SKUs are cheese, and excluding cheese the median drops from 18.0 to ~3.6 g/100g.

Protein composition is mostly market-like. Outside dairy, retailer medians closely track the market; E.Leclerc's dairy outlier is driven by assortment mix.

France category medians: dairy 6.5 • cereals 9.3 • snacks 6.4 • beverages 0.1

Fibre: mostly market-like

Median fibre per 100 g/ml by retailer × category vs France category median. Whole-category medians reflect actual composition and stay very close to the market.

RETAILER	DAIRY France median: 0.0	CEREALS France median: 7.5	SNACKS France median: 2.9	BEVERAGES France median: 0.0
Intermarché	0.0 Δ 0.0	7.2 Δ -0.3	2.6 Δ -0.3	0.0 Δ 0.0
E.Leclerc	0.0 Δ 0.0	6.2 Δ -1.3	2.6 Δ -0.3	0.5 Δ +0.5
Carrefour	0.0 Δ 0.0	6.7 Δ -0.8	2.6 Δ -0.3	0.4 Δ +0.4
Groupe Casino	0.0 Δ 0.0	6.5 Δ -1.0	3.4 Δ +0.5	0.0 Δ 0.0
Groupe U	0.0 Δ 0.0	6.7 Δ -0.8	2.7 Δ -0.2	0.5 Δ +0.5
Auchan	0.5 Δ +0.5	5.9 Δ -1.6	2.8 Δ -0.1	0.5 Δ +0.5

KEY INSIGHT

Across categories, retailer fibre medians are very close to France market medians. Small deviations do not suggest meaningful portfolio reformulation.

France category medians: dairy 0.0 • cereals 7.5 • snacks 2.9 • beverages 0.0

Fibre composition is mostly market-like across retailers and categories.

What do claim-bearing packs communicate?

Private-label functionality is visible — but quality, origin and naturalness are often more common than explicit functional benefits.

Among packs with at least one detected on-pack claim, % carrying each benefit territory. *One pack can carry several benefits, so columns do not sum to 100%.*

BENEFIT TERRITORY	INTERMARCHÉ	E.LECLERC	CARREFOUR	GROUPE CASINO	GROUPE U	AUCHAN

Private labels: disciplined followers, formidable executors

They are built around how shoppers actually buy — category, store, price tier or broader need — not around isolated nutrient claims. That makes them exceptionally strong at scaling proven trends simply, logically and visibly.

1. THE PRODUCT ITSELF

Mostly market-like composition

Across the six French mainstream retailers, protein and fibre medians stay close to category averages. Private label does not need to be nutritionally better; parity is enough.

Market-like composition

2. THE PORTFOLIO

Built around how shoppers buy

Architecture starts from category, store chain, price tier or broader territory / need — not from nutrients. Functional benefits are layered later and usually stay category-native.

Benefit second

3. THE TREND STRATEGY

They follow proven trends

Private labels focus on large, scalable demand spaces: Organic / natural • origin / local • protein • fibre • reduction • free-from. They do not need to fund exploration of small emerging territories until those become massive.

Scale first

4. THE COMMUNICATION

Shameless, visible, simple

Once they enter a territory, they communicate it ruthlessly clearly: HIGH PROTEIN • RICHE EN FIBRES • 60% LESS SUGAR • BIO • LAIT FRANÇAIS. The claim does the navigation work; the product only has to credibly deliver it.

Ordinary composition, extraordinary visibility

STRATEGIC IMPLICATION

Price and promotion are not a defence against private label.

If the PL product delivers comparable composition, sits in a logical portfolio, addresses the same proven need and communicates it just as clearly, a branded product needs another reason to exist.

“10 g protein + HIGH PROTEIN is an entry ticket — not a proposition.”

Private label does not need to invent the trend. It needs to recognize it, simplify it, scale it — and make it impossible to miss.
